Continuation of 11. does NOT place the application in condition for allowance because: In response to applicant's argument that the references fall to show certain features of applicant's invention, it is noted that the features upon which applicating (i.e., a wick has no moving part and operates without the need of any input energy) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, initiations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fet, Cir. 1993). Regarding claims 3-6 in the 102 rejection, it is obvious a typographical error that claims 3-6 being included in the rejected claims. Claims 3-6 stand as allowable subject matters in the Office Action sent 91/400.
